Business Intelligence Analyst

Are you ready to ignite your career with the World's largest sports betting and iGaming company? Are you a critical thinker with a growth mindset? Flutter UKI, are looking for a passionate individual to join our dynamic team as a Business Intelligence Analyst!

Who you'll work with

We are looking for a Business Intelligence Analyst with a background in data visualisation to join our Quants & Analytics team within the trading department. Quants & Analytics is the hub of innovation and outstanding reporting for Flutter UKI trading. The ideal candidate will be responsible for creating impactful Looker dashboards and visualizations to support data-driven decision-making within trading.

Trading is responsible for the creation and management of odds though the lifecycle of an event; Quants & Analytics support this team to ensure that performance is optimum, and decisions are driven by data. Trading work with other tribes to improve our products and help ensure customers are offered a cutting-edge Sportsbook experience; Trading is a fast-paced, multi-functional area working 24/7, 365 days a year.

What you'll do....

- Build interactive and user-friendly Looker dashboards that set the benchmark for excellence, meet the needs of the trading team and provide actionable insights for traders and other stakeholders.

- Coordinate and analyse large datasets to identify trends, patterns, and insights relevant to trading performance.

- Use storytelling techniques to present data in an engaging and accessible manner, enabling collaborators to easily understand trends, patterns, and strategic implications.

- Ensure accuracy and integrity of data used in reports and dashboards.

- Collaborate closely with traders, and other collaborators to gather requirements, understand their needs, and translate them into visualizations and dashboards.

- Integrate data from various sources into Looker for comprehensive reporting and analysis.

- Continuously improve and update Looker reports and dashboards based on user feedback and evolving business needs

- Supporting the development of smarter and more automated reports and models, required to keep pace with a competitive and evolving industry.

How you'll do it….

- Proficiency in Looker (or similar BI tools like Tableau, Power BI).

- Experience with relational databases and SQL highly desirable.

- Strong problem-solving abilities.

- Advanced use of Microsoft Office especially Excel and PowerPoint.

- Demonstrated ability to analyse complex datasets, identify key insights, and present findings in a clear and actionable manner.

- Excellent written and verbal communication skills.

- Proficiency in effectively explaining intricate technical ideas to individuals who are not technically inclined, including collaborators, customers, partners, and team members.

- Solid attention to detail with a focus on data accuracy and quality.

- Proactive and innovative approach to solving problems and optimizing processes.
